#### DATA TYPES

**\*Int= INTEGERS**

I use the int data type because there is no limit on the value of an integer. And it is the most common numeric data type used to store numbers that may have a fractional component

**\*STRINGS**

Strings are represented by using double quotes or single quotes and all the characters between the quotes are item of the strings. And it is a sequence of characters and the most commonly used data type to store text.

**\*PRINT**

#### LIBRARIES CODE IMPORTED

`IMPORT MODULE`

`from tabulate import tabulate`

This allows me to generate the Table I use in the programme

#### REQUIREMENT OF COURSEWORK3

The calculation of the age I will be able to use it in the Coursework 3

#### REFLECTION ON THE CODE

No I don't think I have any reflection on the Code
